Aluminium Metal Pigment

★★★★★ *A Symbol of Quality*

- Bright metallic finish and smooth metallic finish is obtained with coarser grade and finer grade of Metal powder respectively.

Keep the powder away from heat, dust, humidity, chemical fumes & sunlight.

For use in lacquer, first mix the powder with the thinner and then add the lacquer.

Mix the powder and the liquid just before application. Never store in paste form.

- Easy to disperse, stir-in

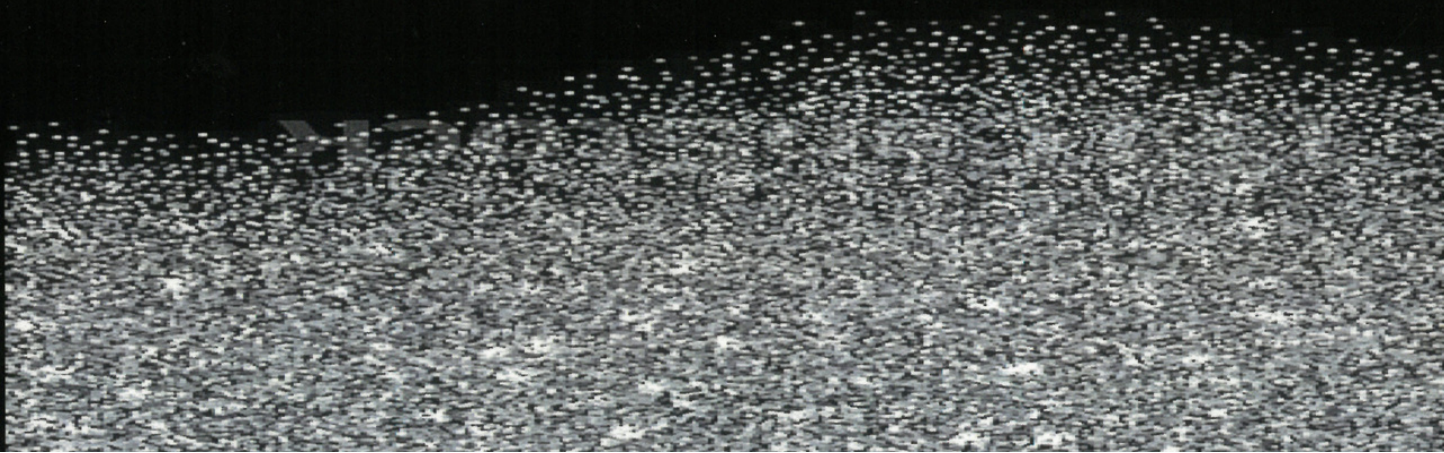

- Aluminium sparkle effect is different from traditional aluminium pigment because of the spherule and granular geometry.

This sparkle gives transparency with glitter effect & can be used to impart pin point sparkle effect while allowing the primary polymer colour to remain dominant

This sparkle grade are based on coarse to very coarse that offer bright & high sparkle appearance.

This sparkle have broad & even particle size distribution range & therefore it gives extra transparency.

- This pigments works well in various kind of plastic like:- plastic
LD, HD, PP, polyester, PVC, engineering plastic, ABS & nylon etc and
also widely used in industries like paint, ink, cosmetics, rubber, textile,
paper, art & craft etc.
